

LIPOBURN

Cellulite Reducing Solution

CELLULITE + SKIN RESTRUCTURING

5 x 10 ml

What is it? LIPOBURN Solution

LIPOBURN is a professional use, sterile, cosmeceutical solution for the treatment of compact or fibrous cellulite.

This solution may help to accelerate lipolysis and biostimulation of collagen and elastin fibres, encouraging micro-circulation, thanks to its combination of L- Carnitine, Organic Silanol, Caffeine and Centella Asiatica.

Benefits

- Helps reduce appearance of cellulite
- Accelerates lipid metabolism
- Improves skin tone and texture

Active Ingredients

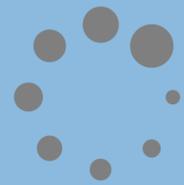

Combining proven lipolytic and skin firming ingredients including:

L-Carnitine transports long-chain acyl groups from fatty acids into the mitochondrial matrix, so they can be broken down through β -oxidation to acetyl CoA to obtain usable energy via the citric acid cycle.

Organic Silanol stimulates fibroblasts and promotes the biosynthesis of collagen and elastin.

Centella Asiatica (Gotu Kola) has a wide range of benefits including anti-oxidant, stimulating lipolysis, enhancing lymphatic drainage, protecting capillaries and blood vessels, enhancing the production of collagen with a skin firming action.

Caffeine causes an increase in the intracellular concentration of the cyclic AMP (acid adenosín-5- monophosphoric cyclic) and has immediate consequences in the lipid metabolism of adipose tissue and thus an increase in the levels of the cyclic AMP.

Transdermal Therapy

Designed to penetrate the skin with different methods of application.

- Topical application with simple rubbing.
- Topical application during massage.
- Virtual mesotherapy, E.g. iontophoresis, electroporation, ultrasound, etc.
- Collagen Induction Therapy (CIT) E.g. Skin needling, Dermapen, etc.

Protocol

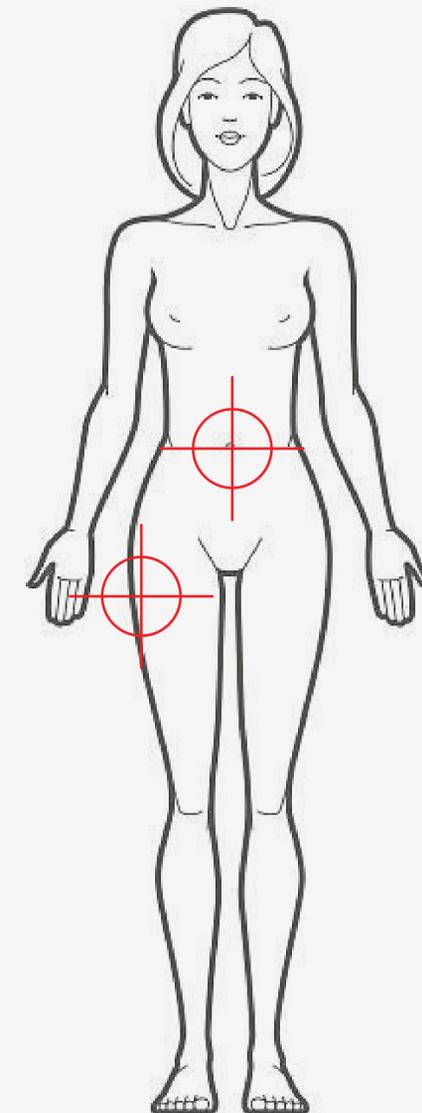

Using the transdermal therapy technique chosen by the professional, apply 7-20ml of the solution. Treat with one session, every 7 days, for 10 sessions, depending on the progress of results.

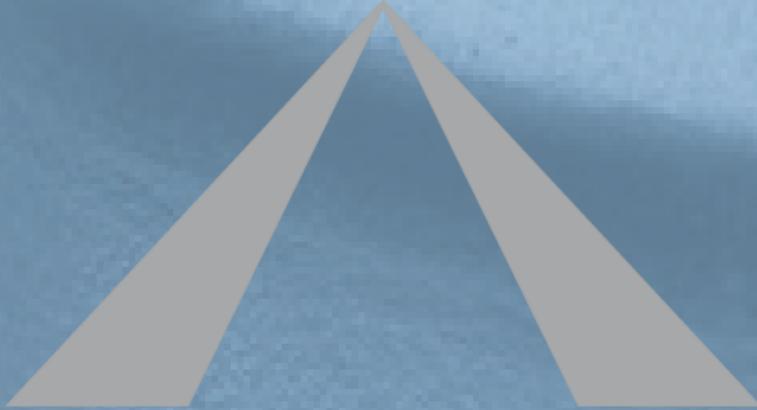

Two week break after tenth treatment to rebalance metabolism. Repeat as required to achieve treatment objectives followed by maintenance sessions every 3-6 months.

Areas of application

Cellulite affected skin on any area of the body.
