

STRONGFIRM

Firming Solution
TONING + RESTRUCTURING

5 x 10 ml

What is it? STRONGFIRM Solution

STRONGFIRM helps stimulate connective tissue synthesis, counteracting the loss of skin tone and elasticity common with aging and living a full life.

It is a professional use, sterile, cosmeceutical solution.

Benefits

- Firmer skin
- Improved skin tone and texture
- Increased hydration
- Immediate and progressive lift
- Stimulates fibroblast activity
- Restores intercellular matrix

Active Ingredients

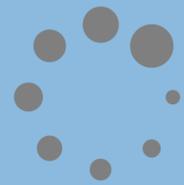

DMAE (Dimethylaminoethanol Tartrae), Organic Silanol, Thiamine HCl (B1), Hyaluronic Acid CUBE 3®.

DMAE has a skin soothing effect and increases skin firmness with improvement in underlying facial muscle tone.

Organic Silanol stimulates fibroblasts and promotes the biosynthesis of collagen fibres and elastin.

Thiamine HCl (B1) antioxidant, helping to guard the body against the degenerative effects of free radicals.

Hyaluronic Acid CUBE 3® is a glycosaminoglycan which quickly restores skin integrity. Skin treated with Cube 3® reacts in a more adaptive manner, thanks to evolutive interaction between the matrix hyalurons and their cell receptor, CD44. This gives the cell the capacity to sense its micro-environment and, in return, to respond (by signal transduction or by cytoskeletal dynamics regulation) and provoke a more specific cellular answer.

Transdermal Therapy

Designed to penetrate the skin with different methods of application.

- Topical application with simple rubbing.
- Topical application during massage.
- Virtual mesotherapy, E.g. iontophoresis, electroporation, ultrasound, etc.
- Collagen Induction Therapy (CIT) E.g. Skin needling, Dermapen, etc.

Protocol

Using the transdermal therapy technique chosen by the professional, apply 5-10ml of the solution. Treat with one session every 7 days, for 5-8 sessions, depending on the progress of results.

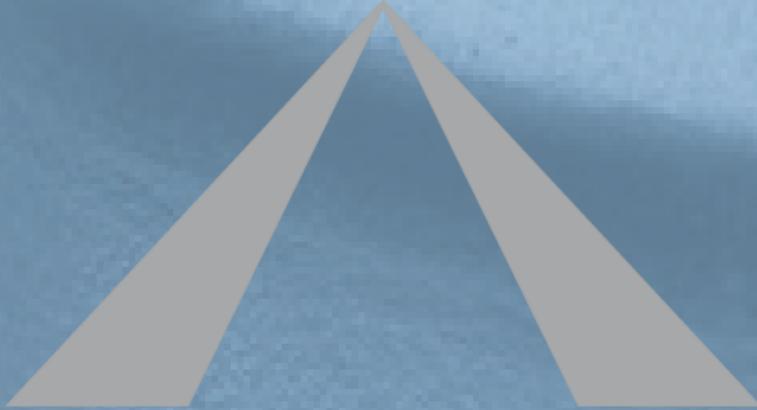

Repeat as required to achieve treatment objectives followed by maintenance sessions every 3-6 months.

Areas of application

Any area of the face or body.
